**FPL INSTRUCTION 01/2025:**

1. Incomplete Attendance registers
2. Training Logs incomplete and not signed off by Principals
3. Personnel Files
4. Proficiencies

Good Day AIMO's

During our recent SA CAA Oversight Audit; the above non conformances were identified which require immediate attention from OJTI's, Students and Management.

1. Attendance registers are not being completed in line with O INSTR 2/2011. This is a Routine Function and should be part of your HANOVER/TAKEOVER duties.

Attendance registers are to be completed in **LOCAL TIME**, and **START TIME** captured on shift arrival, The **End TIME** shall be captured at the **END of the shift**.

**NB/If one experiences challenges with accessing or competing ones attendance register, inform management without delay.**

**Periodic checks shall be completed by AIM MNGT on Attendance Registers and non conformances shall be actioned appropriately.**

2. Training Logs must be **completed diligently** and signed off by OJTI's and **STUDENTS during every shift**. As part of your OJTI Debrief, the objectives covered during the shift will be discussed, comments noted, Hours of the shift totalled and signatures of both Instructors and Students complete. Only then; should the student be dismissed.

When the student writes a TEST or EXAM or if an ASSESSMENT is being conducted on his/her shift, The marks and comments must be captured on the progress sheet and both the Trainee and Instructor must SIGN.

When conducting a FINAL ASSESSMENT, the FINAL REPORT, at the end of the Log, shall also be completed.

NB/Timely (WEEKLY) checks by AIM MNGT will be performed on TRG LOGS and ***non conformances shall be actioned appropriately***.

3. Personnel Files kept at the AIMU; must contain **JOB PROFILES and TRAINING RECORDS only**. We are in the process of updating all staff Supervisory files.

To assist this Internal process, we will require from staff, a Training Record and a copy of all certificates for ATNS courses completed by staff. This can be handed over to our Administrator or AIM MNGT. Job profiles in the new format will be circulated, please ensure that you timeously sign, and send back to our Administrator or AIM MNGT.

4. **Proficiencies:** Proficiencies are scheduled to be completed by the end of Cycle 2, (20 APR 2025). Dates for the practical proficiencies will be circulated with Cycle 1 and 2 rosters. Please ensure that you double check that you are rostered and honor your shifts for proficiencies, and expect to write theory proficiency assessments between today and the end of Cycle 2.

Please ensure strict compliance.

Any queries/concerns to the above instruction can be directed to AIMU Management.

Kind regards,

Mahendra Sukdev and Mpho McDon

**NB/Please sign in the relevant spaces provided**

**The instruction must be signed immediately as part of your taking over shift duties. If one is on leave, the instruction should be signed on the 1st day of you returning to work.**

**NOTAM INSTRUCTION 02/2025:**

**1. CAD MESSAGES CONTAINING INCONSISTENT/INCORRECT NOF ASSOCIATED TO AN FIR**

Good Day NOF

The screenshot shows a software window titled "Queued NOTAM". The main table has two rows. The first row contains columns for NOF (FAJN), Ser No (A 4654), Year (24), Type (N), Ser No, Year, and Ser Type (INT). The second row contains columns for FIR (LPPO), NOTAM Code (QFF LC), Traffic (IV), Purp. (BO), Scope (A), Lower (000), Upper (999), Coordinates (3745N02541W), and Radius (005). Below the table, there are input fields for fields A through G. Field A contains "LPES". Field B contains "2411141300". Field C contains "2502141700". Fields D and E are empty. Field F contains "HELIPORT CLSD.". There are "Add Remark" and "Convert" buttons at the bottom right.

- The reason for the exorbitant amount of RQN Messages on the CAD NOTAM Q is attributed to the Notam example above.
- The Notam was Processed/Accepted for **LPPO FIR**, however the **NOF is FAJN**.
- The CAD system would then do a **RQN for the MISSING NOTAM NUMBERS for FAJN A SERIES**, although the Notam is for LPPP NOF.
- The **INCORRECT NOF (FAJN)** being associated to the FIR (LPPO) will create this problem.
- During the VALIDATION process on CAD; if you notice this Validation error on any Notam, **where the NOF does not match the FIR, please report it to me**, P: ARO ASAP
- **P:ARO will report to Lee Roy who will make the changes** in the backend so we don't experience this issue over and over again using the TABLE below.

	A	B	C	D
1	No	AD	NOF	
2	1	EDDB	EDDZ	
3	2	EDDC	EDDZ	
4	3	EDDF	EDDZ	
5	4	EDDH	EDDZ	
6	5	EDDK	EDDZ	
7	6	EDDL	EDDZ	
8	7	EDDN	EDDZ	
9	8	EDDP	EDDZ	
10	9	EDDT	EDDZ	
11	10	EDDV	EDDZ	
12	11	EDDW	EDDZ	
13	12	FGBT	LEAN	
14	13	GCCC	LEAN	
15	14	GCFV	LEAN	
16	15	GCGM	LEAN	
17	16	GCHI	LEAN	
18	17	GCRR	LEAN	
19	18	GCTS	LEAN	
20	19	GCXO	LEAN	
21	20	LEAM	LEAN	
22	21	LEAS	LEAN	
23	22	LEBL	LEAN	

- **NOF will DELETE that specific Notam thereafter.**
- If you are unsure, please engage with Themba or Myself.

Thank You.

Please ensure strict compliance.

Any queries/concerns to the above instruction can be directed to AIMU Management.

**NOTAM INSTRUCTION 04/2025:**

- 1. UAS, SPORT & RECREATION & OBSTACLE NOTAM CONTAINING GPS COORDINATES AND STORING THESE ISSUED NOTAM ON GOOGLE EARTH FOLDERS**

Good Day NOF

As part of our Agile processes, continuous improvement processes and offering additional Value Added services to our clients, the FLW procedure has been designed.  
If you have any suggestions and ideas to improve this process, kindly discuss with me.

Coordinates stored on GOOGLE EARTH:

**1. OBSTACLE NOTAM:**

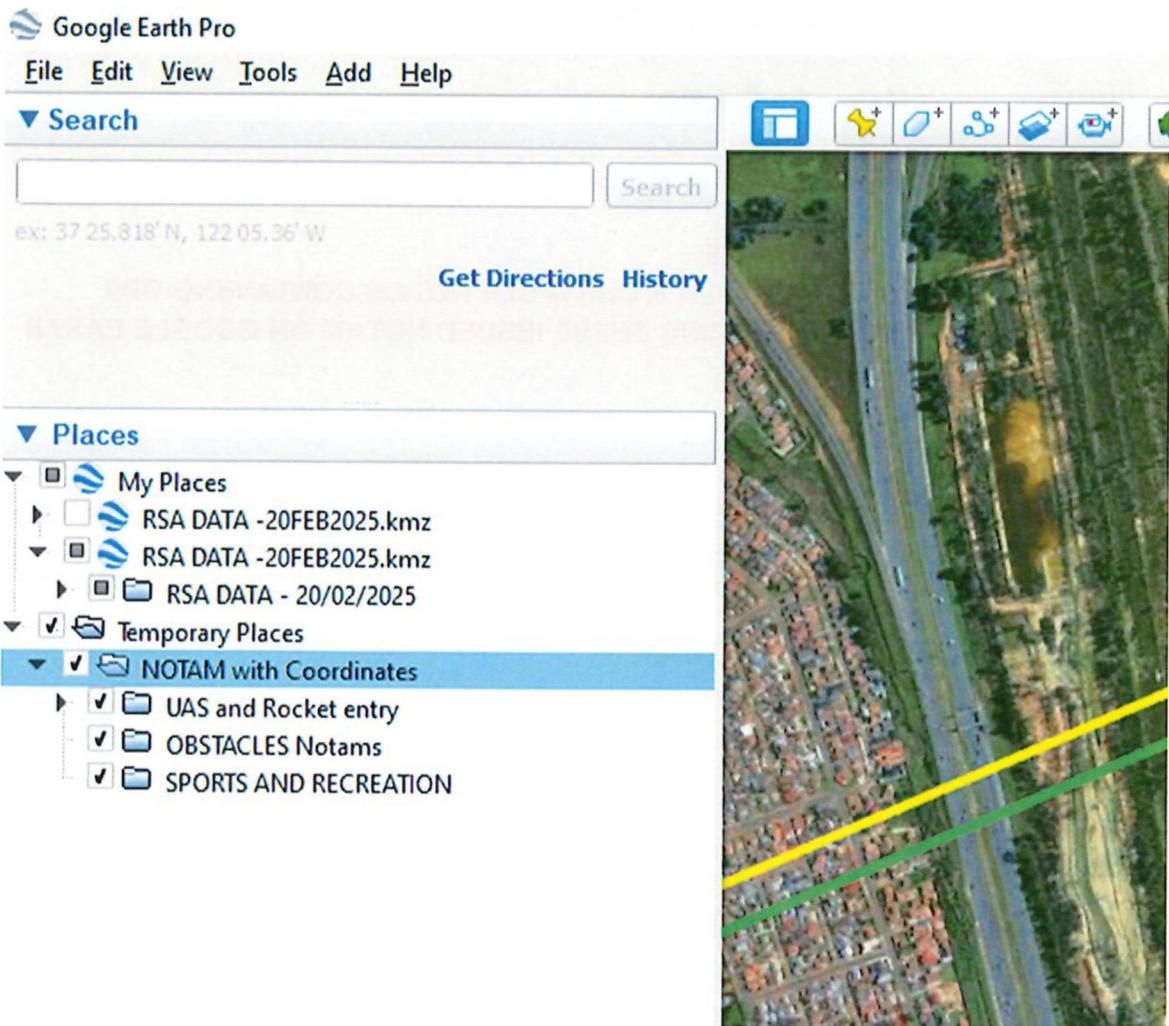

- Crane
- Wind sock, Scarecrows
- Balloon erected
- Blasting

**2. UAS and Rocket entry NOTAM**

- RPAS, Drones, UAV, ETC....

**3. Sports and Recreation NOTAM**

- PJE
- Weather balloon/ascent of free balloon
- Flypast/fly-in/air display

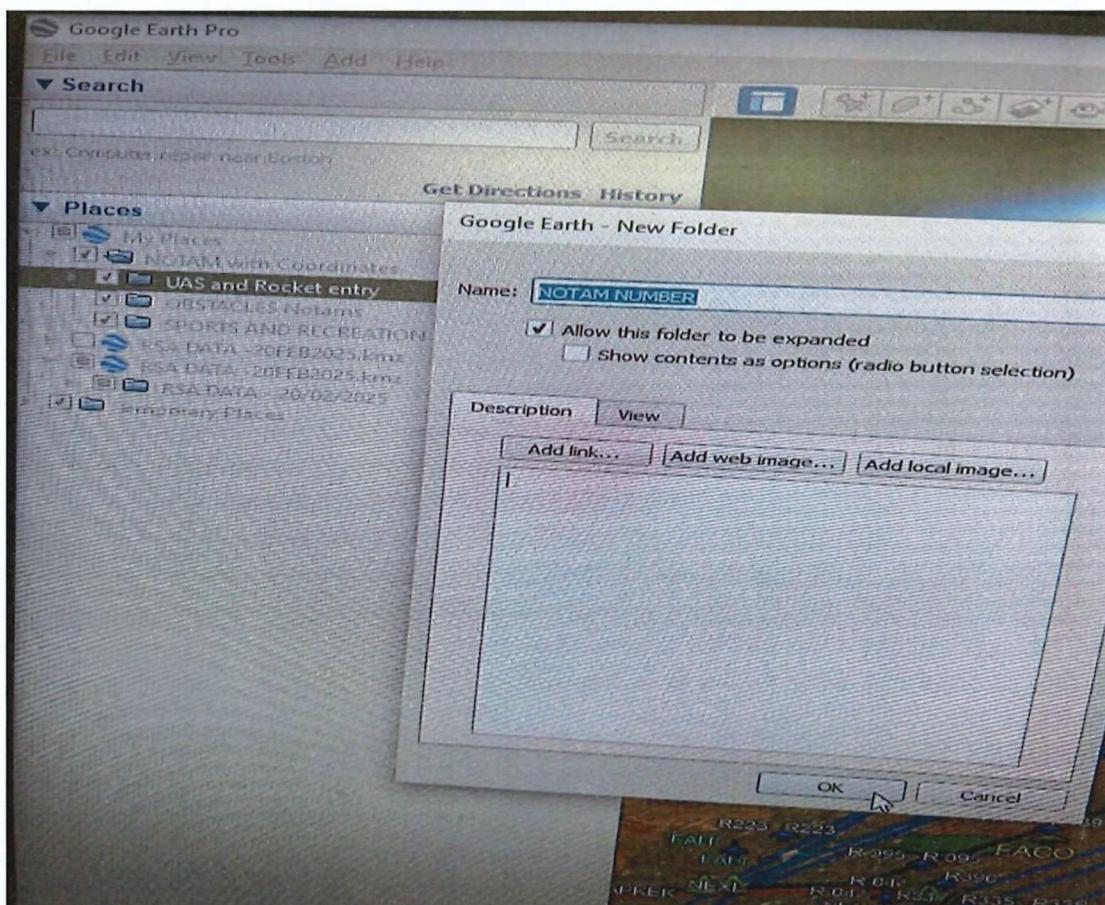

**NB/These folders must be created by the NOF on each AIRAC CYCLE as soon as the KMZ FILES are updated.**

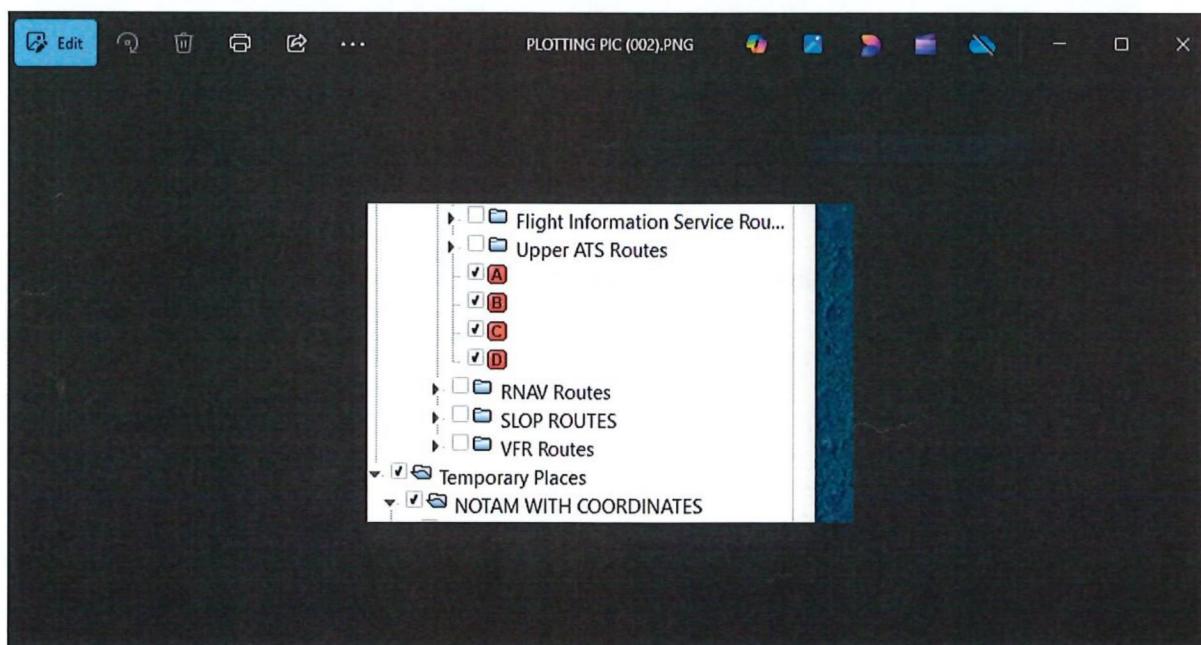

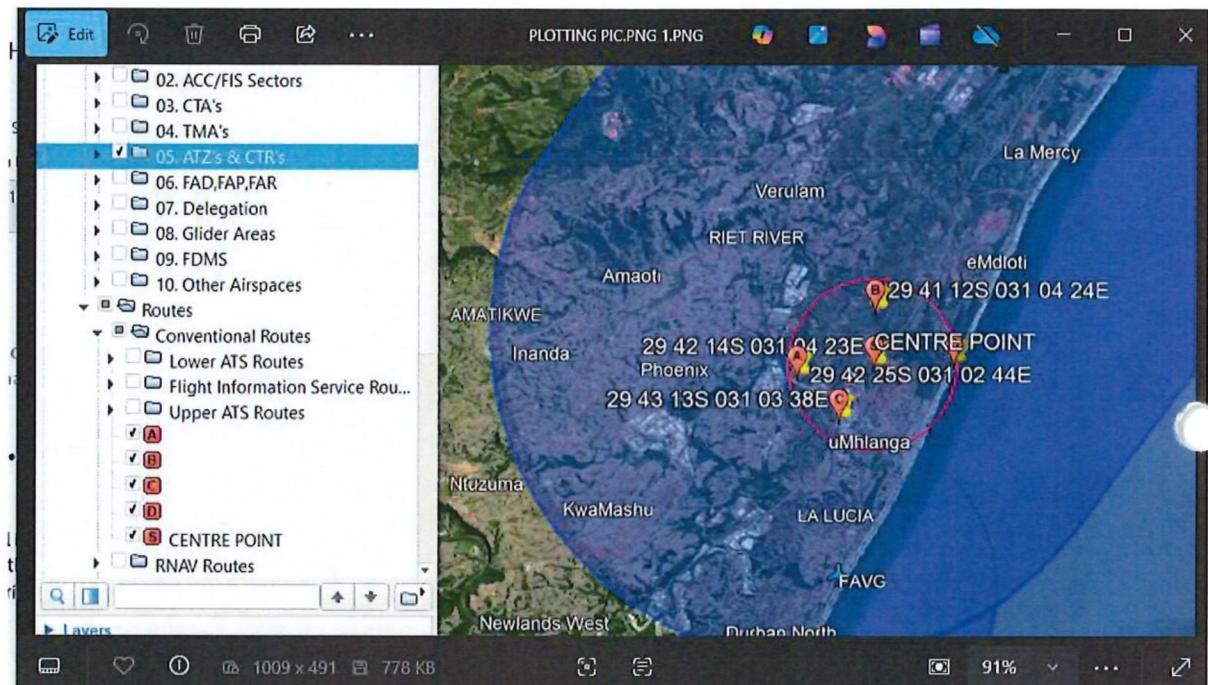

- These must be created under "**Temporary Places**" as indicated above.
- The MAIN FOLDER should be **NOTAM WITH COORDINATES**.
- The SUB FOLDERS should be **UAS AND ROCKET ENTRY & OBSTACLE NOTAMS & SPORTS AND RECREATION**.
- A) When issuing a NOTAM for the above, create a folder under the correct category of the NOTAM (**UAS, OBSTACLES OR Sport and Recreation**).

**NB: Folder should be created after plotting all the coordinates and NOTAM is issued.**

B) Name the folder as the **NOTAM number**.

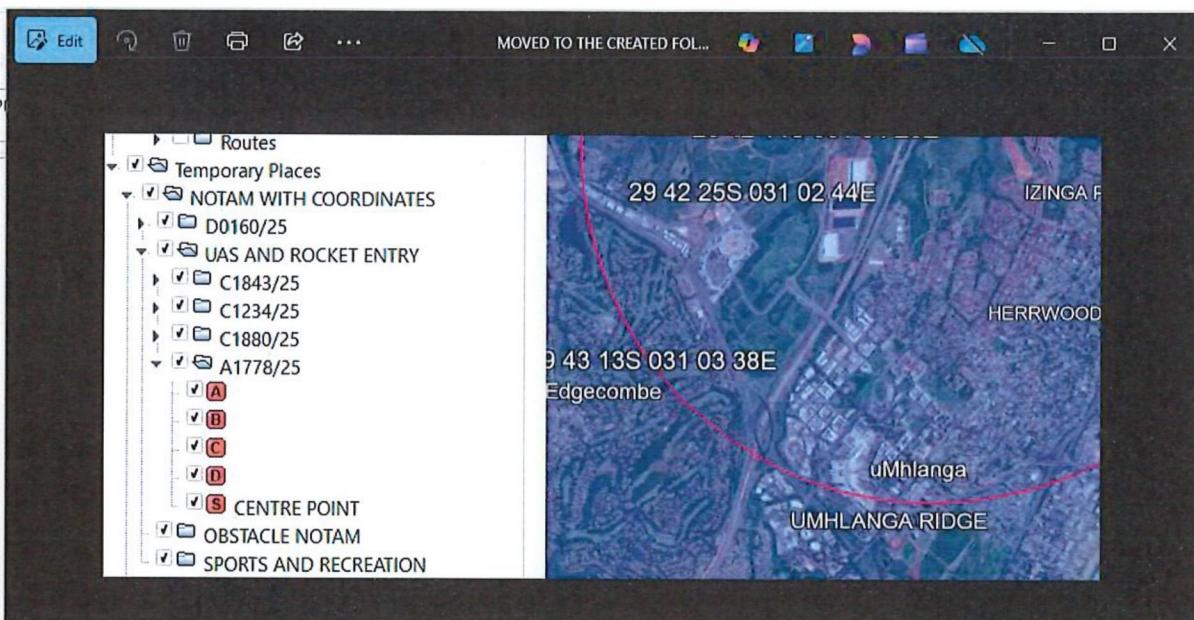

C) Drag all the coordinates into the folder created under the NOTAM number.

**Example:** GPS Coordinates (A, B, C, D) appear in the “**Upper ATS Routes**” folder.

These GPS coordinates (**(A, B, C, D)**) must now be dragged from the "**"Upper ATS Routes"** folder to the folder created under the NOTAM number. See below.

**NB/IF you are seeing too many NOTAM GPS POINTS on your screen, UNCLICK the previous NOTAM issued on the left hand side task bar.**

**NB/On AIRAC Cycle Date, the old KMZ file must be emailed to Raoul Bester and Mahendra Sukdev. BOTH NOTAM POSITIONS SHOULD E-MAIL THEIR RESPECTIVE KMZ FILES TO RAOUL & P: ARO. The New KMZ File will now be downloaded and the appropriate folders be created as per instruction above.**

Thank You.

Please ensure strict compliance.

Any queries/concerns to the above instruction can be directed to AIMU Management.

Kind regards,

Mahendra Sukdev

FROM : Mahendra Sukdev

DATE : 03 June  
10 May 2025

**NOTAM INSTRUCTION 05/2025:**

1. ST HELENA NOTAM PROCEDURES
2. OBSTACLE NOTAM (Cranes, Windfarms, Solarfarms, Cellphone Towers, Weather balloon/ascent of free balloon)
3. DYNAMIC DATA: UPDATING OF DATA ON ANAIS

Good Day NOF

As part of our continuous improvement processes and standardisation of NOTAM being issued: I have requested ST HELENA to comply to the FLW procedure.

1. ST Helena **SHOULD NOT** be requesting NOTAM: "**AD OPEN: ALL SER AVBL.**" If they do, kindly REJECT.
2. The NOTAM must state Which SER are AVBL. In line with ICAO Standards, Different NOTAM for each SER must be issued by the NOF.
3. For ADDN HR OF SER: Different NOTAM for each SER must be issued by the NOF and ST HELENA must provide the frequency in use for TWR and APP.
4. If the AD is CLSD: Issue 1 NOTAM, stating AD CLSD. ***Don't issue multiple NOTAM for each SER that is closed.***

**OBSTACLE NOTAM:**

1. As per email attached from the SA CAA: NOF does not need approval from SA CAA to issue Obstacle Notam.
2. Upon issuing the Obstacle NOTAM; Please send a copy to the SACAA AIS office for awareness purposes.

**UPDATING DATA ON ANAIS:**

We have picked up a major loophole relating to the updating of DATA on ANAIS. The ARINC 424 file created by DIS, that is used to update ANAIS, on AIRAC date, only contains updated DATA which has been incorporated into the SA AIP.

This resulted in a major incident on the 15 MAY, where waypoint "UNPOM" was a NEW STAR for FAOR which was effective on the 15 MAY and FPL filed by AIRLINES, were REJECTED due to the "UNKNOWN WAYPOINT" on ANAIS.

**As a mitigation; the FLW will procedure will apply:**

- All Waypoints, Airport Terminal Waypoints, Navaids, Routes, etc.. that requires ANAIS to be updated must be updated using the latest AIP SUP on AIRAC date.
- CHARTS AIP SUPPS are published with "AERONAUTICAL DATA TABULATION" information (see examples attached); using this INFO, perform a quality check on all published information, as well as insert all NEW INFORMATION onto ANAIS.

**NB/IF you cannot find the 'AERONAUTICAL DATA TABULATION' information on the charts, please ask for HELP. If you have challenges with inserting NEW DATA on ANAIS, please ask for HELP. Don't leave things unattended. You are compromising Safety.**

Thank You.

Please ensure strict compliance.

Any queries/concerns to the above instruction can be directed to AIMU Management.

Kind regards,

Mahendra Sukdev

The banner features the SACAA logo and the slogan "Keeping you safe in the sky". It announces the move to a new location at Byls Bridge Office Park, Centurion, effective from 1 June 2025. It highlights easy access via major highways R21, N1, N4 and public transport. The banner also includes the text "SACAA ON THE MOVE NEW LOCATION" and "An unwavering commitment to aviation safety and security!". A "Report fraud and corruption" section provides contact details: 0800 204 911, [sacaa@thehotline.co.za](mailto:sacaa@thehotline.co.za), and SMS: 30916. A "TOP EMPLOYER South Africa 2025" badge is visible in the top right corner.

"This message was sent from outside of SACAA. Please use caution when opening links and/ or attachments"

Good Day Vusi

Thank You for the information

Can you clarify that all obstacle NOTAM (Wind Farms, Wind Turbines, Cranes, etc..) requested from the NOTAM originators can be processed by the NOTAM office, without it going via your offices for Approval ?

Thank You

Regards,

**Mahendra Sukdev**

**Subject:** RE: New ATNS NOTAM Request Form

Good day Colleagues,

Yes, the NOTAM can be issued.

As advised by your office, once our oversight is complete, the service provider will need to request the NOTAM through the NOTAM office. Previously, we initiated this process, but since the service has been transferred to service providers, they are now responsible for this initiation.

Kindly note that this procedure will apply to all such requests, as the service provider will hold an approval from the CAA, similar to the example attached.

Regards,

**Simphiwe Masilela**

**FPL INSTRUCTION 06/2025:**

**1. RPAS AND BVLOS OPERATIONS pertaining to FILING of a FPL**

Good Day AIMO's

BVLOS operations refer to "Beyond Visual Line of Sight" operations in the context of unmanned aerial vehicles (UAVs) or drones.

***Definition:***

*BVLOS means flying a drone outside the direct visual range of the remote pilot. Unlike VLOS (Visual Line of Sight), where the operator must be able to see the drone without binoculars or camera feeds, BVLOS allows the drone to be flown using onboard sensors, GPS, and/or other technologies.*

As per the attached **AIC D005/2017: FILING OF FLIGHT PLANS FOR REMOTELY PILOTED AIRCRAFT SYSTEMS (RPAS) : PG 2 C) FIELD 8 (FLIGHT RULES)** : A pilot must indicate FLIGHT RULES as "I" (IFR) when flying BVLOS operations.

When receiving a RPAS FPL, that has flight RULES "IFR", the pilot must indicate in FIELD "18" RMK/BVLOS; if they don't, REJECT the FPL requesting them to confirm if the flight is BVLOS in Field 18 of the FPL.

The Level in FIELD 15 for **IFR flight rules** (BVLOS Flights) must be indicated as Altitude, if the RPAS does not reach the Transition Altitude. (**Altitudes like A004 OR A010 is acceptable**).

**FL should only be used** when the pilot is climbing through a Transition Altitude and thus flying at a Flight Level.

If the pilot provides a FL, check the Transition Altitude of the Area (SA AIP ENR 1.7.2, 1.7.3 and 1.7.4) and if you ascertain that the Flight level provided is below the Transition Altitude for that area, kindly DELETE the FPL, advising the pilot that it should be an **ALTITUDE and not FL**.

**NB/The attached AIC D005/2017 (RPAS Flight Planning) is being amended to reflect the above changes.**

Please ensure strict compliance.

Any queries/concerns to the above instruction can be directed to AIMU Management.

Kind regards,

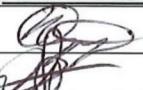

A handwritten signature in black ink, appearing to read "Mahendra Sukdev".

Mahendra Sukdev

**NB/Please sign in the relevant spaces provided**

**The instruction must be signed immediately as part of your taking over shift duties. If one is on leave, the instruction should be signed on the 1st day of you returning to work.**

#### **AIR NAVIGATION SERVICES**

#### **FLIGHT PLANNING**

#### **FILING OF FLIGHT PLANS FOR REMOTELY PILOTED AIRCRAFT SYSTEMS (RPAS)**

#### **INTRODUCTION**

The purpose of this Aeronautical Information Circular (AIC) is to inform users and the industry of the recommendations that have been formulated by the South African Civil Aviation Authority (SACAA) in conjunction with the Air Traffic and Navigation Services Company (ATNS) in the absence of any Standard Recommendations or Procedures/ Practices (SARPS), offered by the International Civil Aviation Organisation (ICAO).

It is important to note that all RPAS Operators wishing to conduct flights inside controlled airspace must follow these procedures:

1. Complete a Flexible Use of Airspace (FUA) application form with the ATNS Central Airspace Management Unit (CAMU). This link can be found on the ATNS website. [www.atns.co.za](http://www.atns.co.za) select "Flexible Use of Airspace" icon.
2. Must file a Flight Plan (FPL) with The Aeronautical Information Management Unit (AIMU) on the Internet Briefing Service – (File2Fly – <https://file2fly.atns.co.za/aes/login.jsp>). The Flight Plan must state the CAMU reference number in Field 18. The FPL may be filed up to 5 x days before the proposed flight. This link can also be accessed via the ATNS website.
3. The RPAS Pilot must discuss the intended operation (as per FPL filed) with the relevant Air Traffic Services Unit (ATSU) prior to flight. This can be done by contacting via telephone, the relevant Pool Manager, Officer in Charge, Tower Controller or Ground Controller of the relevant ATSU.
4. All RPAS Operators wishing to fly outside the ambit of Part 101 of the Civil Aviation Regulations, 2011 (e.g. requesting to fly higher than the permitted 400ft AGL in uncontrolled airspace), must complete an FUA application form with the CAMU and await authorization to do so. This authorization takes approximately 48 hours. This will be granted on submission of a valid ROC and Operations Specification (OPS SPEC), displaying approval for the requested operations.
5. All other RPAS flights operating within the ambit of Part 101, must contact either the AIMU or the CAMU – except for local RPAS flights.

With the advent of the continued development and expansion of RPAS, combined with a growing number of RPAS Operators conducting RPAS flights inside controlled airspace, and in order to standardize the filing of RPAS Flight Plans, please be advised of the following when filing an RPAS Flight Plan:

The ICAO Flight Planning formatting process will be complied with thus ensuring seamless processing and management of the FPL information. The following guidelines should be used for the filing of RPAS Flight Plans:

## THE RPAS FLIGHT PLAN

- A) **FIELD 7 (AIRCRAFT IDENTIFICATION)** – insert the RPAS's registration, e.g. ZTABC;
- B) **FIELD 8 (FLIGHT RULES)** – Insert 'V' for all RPAS flights which will be flown at a VFR height AGL, OR
- C) **FIELD 8 (FLIGHT RULES)** – Insert 'I' for all flights which will be flying Beyond Visual Line of Sight (BVLOS) or those RPAS flights which will be climbing through a Transition Altitude and thus flying at a Flight Level. All these flights (BVLOS) will be considered to be flying under IFR and will therefore select IFR Flight Levels according to the Semi-circular Rule;
- D) **TYPE OF FLIGHT** – Insert 'X'. Follow this by inserting in Field 18 – STS/ATFMX (this will indicate it is an RPAS flight);
- E) **FIELD 9 (NUMBER)** – insert '01' (or the number of RPAS's involved);
- F) **TYPE OF AIRCRAFT** – insert 'ZZZZ'. Follow this by inserting in Field 18 – TYP/ multi-rotor or aeroplane or helicopter;
- G) **WAKE TURBULENCE CATEGORY** – Insert 'L' (This means it is a light aircraft);
- H) **FIELD 10 (EQUIPMENT)** – insert a 'V' (VHF Radio – this is compulsory equipment in controlled airspace). Next to the 'V' place a 'Z' (GPS). Then, after the forward slash, insert your transponder equipment such as 'N' (nil), 'C' (mode C) or 'S' (mode S) – 'C' or 'S' are compulsory in controlled airspace, except if exemption has been obtained from the Director of Civil Aviation, the CAMU or the relevant ATSU. When specifying 'Z' (GPS) in this Field, follow this by inserting in Field 18, NAV/ GPS;
- I) **FIELD 13 (DEPARTURE AERODROME)** – Insert ICAO aerodrome designator. If operating from a non-ICAO designated aerodrome, insert 'ZZZZ'. Follow this by inserting in Field 18 – e.g. DEP/Brakpan Mall XXXXS and XXXXXE (e.g.; coordinates S & E – e.g. 2503S 02659E - no seconds required);
- J) **TIME** – simply fill in your estimated time of departure (ETD) in UTC, e.g. 0730;
- K) **FIELD 15 (CRUISING SPEED)** – insert the RPAS cruising speed in knots – e.g. 'N0025';
- L) **LEVEL** – insert 'VFR' if flying 'V' or insert a Flight Level, e.g. 'F090' if flying 'I' and ensure this Flight Level complies with the semi-circular rule; Should you utilize 'VFR' in this Field, indicate in Field 18, VFR level/height/altitude – e.g. VFR/400FT AGL.
- M) **ROUTE** – the following is an example for a VFR flight conducting a film shoot over Checkers at the Brakpan Mall, e.g. 'DCT 2503S02659E (Latitude and Longitude – no seconds required) OR define a 'filming box' by plotting four sets of coordinates overhead the Checkers precinct. (eg. DCT 2356S 01835E 2352S 01846E 2354S 01819E DCT. This could be a box measuring 300 square meters and will indicate that you will remain inside that box at all times.
- N) **FIELD 16 (DESTINATION AERODROME)** – Insert ICAO aerodrome designator. If operating from a non ICAO designated aerodrome, insert 'ZZZZ'. Follow this by inserting in FIELD 18 – DEST/ BrakpanMall 2503S 02659E XXXXS and XXXXXE degrees south and east – no seconds required, (this would probably be the same point you departed from);
- O) **TOTAL EET** – simply insert the total estimated flying time of the operation, e.g. '0035';
- P) **ALTERNATE AERODROME** – one can leave this box blank or if flying IFR (BVLOS) simply insert 'EN ROUTE';
- Q) **FIELD 18 (OTHER INFORMATION)** – this Field is used to do all the explaining of the items unexplained above, e.g. all the ZZZZ's, the routing, etc., e.g. STS/ATFMX (space) TYP/multirotor (space) NAV/ GPS (space) DEP/Brakpan Mall xxxxx Exxxx S (space) VFR/100FT AGL (space) DEST/BrakpanMallxxxxS xxxxE (space) OPR/RPAS FLIGHT 0725552345 (space) RMK/SARNIL;

7

O

O

C

O

R) **FIELD 19 ENDURANCE** – insert the RPAS flying endurance (this is usually the battery endurance).

S) **AIRCRAFT COLOUR AND MARKINGS** – self-explanatory

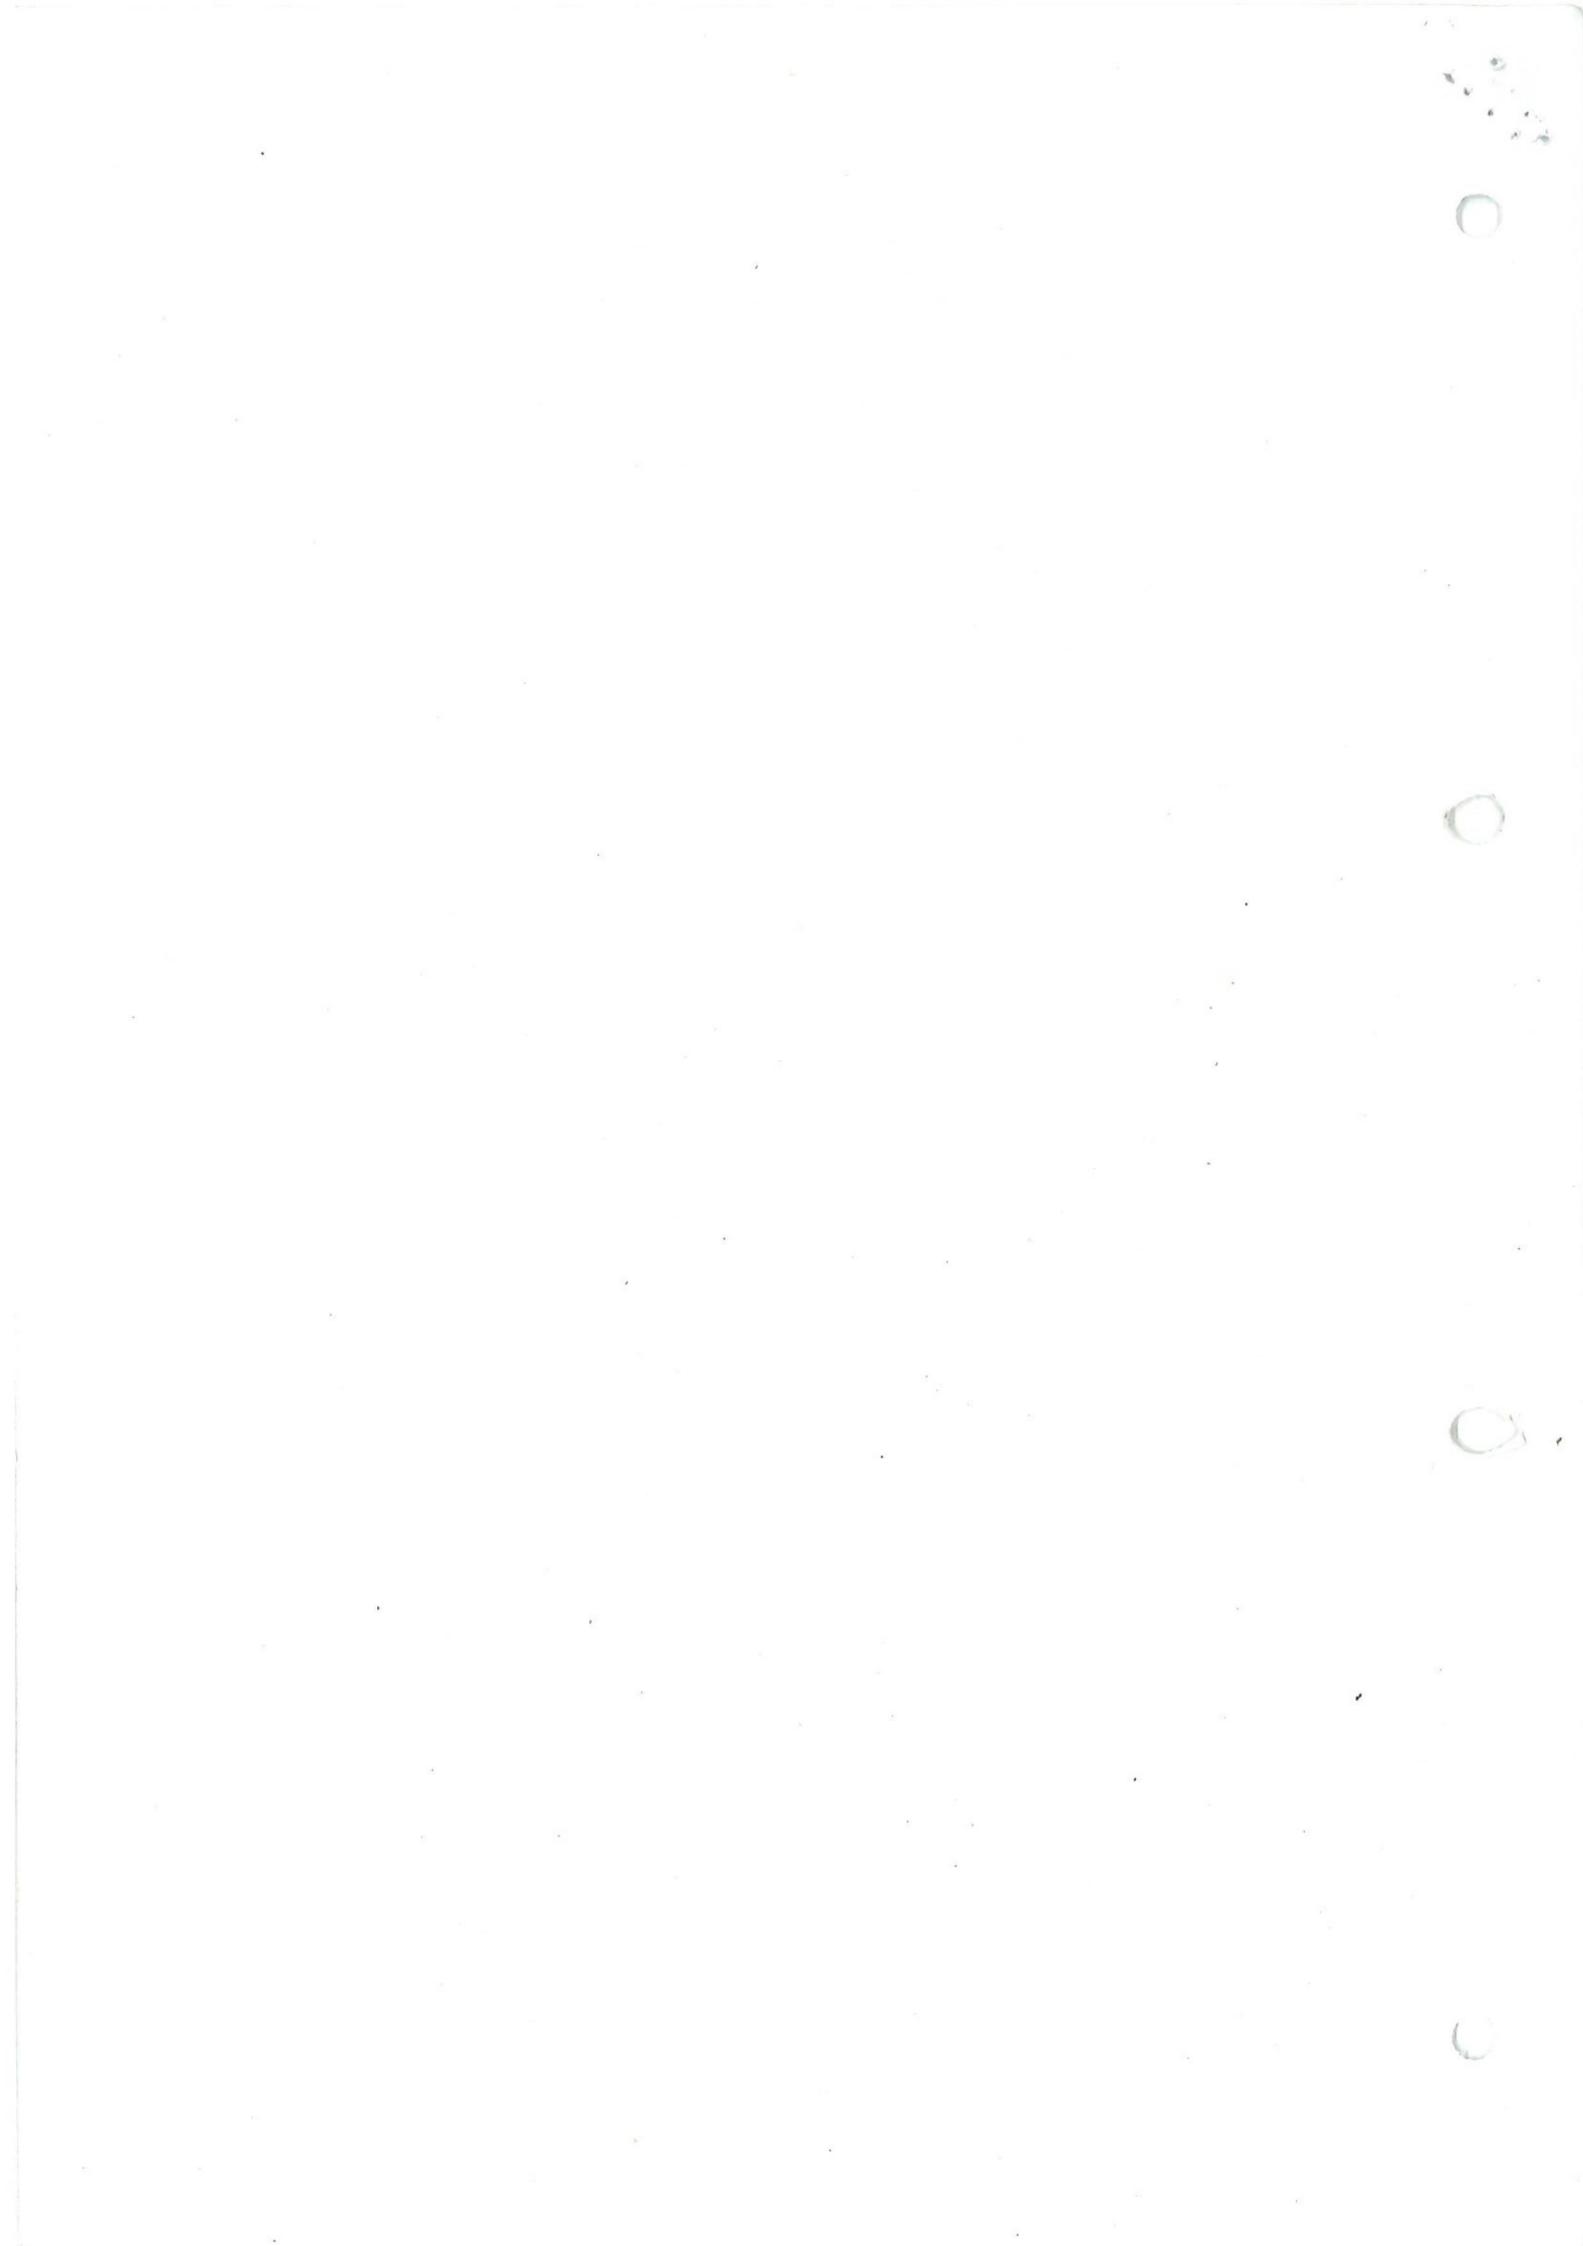

T) **PILOT IN COMMAND** – self-explanatory.

Flight Planning queries can be directed to: AIMU File2Fly Helpdesk – 011-928 6423

Flexible Use of Airspace (FUA) queries can be directed to CAMU – 011-928 6433.

**DIRECTOR OF CIVIL AVIATION**

Name of meeting : AIMU Pool Meeting  
Department : AIMU  
Date of Meeting : 24 July 2024

No:	Item	Responsible Person	Date
1.	Welcome PM welcomed all to the meeting.	Mcdon	
2.	Attendance 2.1 Attendance registers as attached. 2.2 Apologies noted: Mahendra & Nthabiseng	Ncebakazi	
3	Approval of Agenda 3.1 Agenda was approved by all		
4.	Confirmation of the Minutes 4.1 Minutes were published on the Memo file for all to access	Mcdon	
5	Matters Arising 5.1.1 No new matters arising from previous meeting.		
6.	Standing Items No standing items	Mcdon	
6.1	Values Moment – Diversity At ATNS we have different cultures and races. A big thank you to the team within the Unit for continued respect for one another and acceptance of our differences, there has never been an incident where we had to deal with bad behaviour or treatment due to the differences we have. A respectful work environment is beneficial to our mental health thus we should continue upholding this value as a unit for continued safe working space.	Mcdon	
6.2	SAFETY Tshikani and Nthabiseng are part of the Safety Committee at the OR Centre. This is to ensure that all the safety issues that arise at AIM are attended to and dealt with promptly. All safety matters or concerns within the unit are to be reported to the two employees that are in the committee.	Mcdon	
6.3	OHAS We had to temporarily move to the TTDS as there was an unbearable smell that surged the whole centre. It was coming from the pipes and plants due to maintenance and cleaning that took place at the basement. The issue was soon resolved after cleaning. It is important to occasionally change settings on the Aircon to help	Mcdon	

	with clean air circulation to prevent any unpleasant smells that can cause health problems.		
6.4	<b>QMS</b> An email has been sent to staff members to attend the QMS training online with all the steps to log in and access the training. It is important that we all comply with QMS and ensure that our certificates are up to date and renewed every year. A list of names with QMS expiry date will be placed up in the office for all employees to access and keep track of when their certificates expire.	Mcdon	
7.	<b>ATN</b> <b>7.1 General</b> A big thank you to the staff members that populate the checklist as and when required. We urge all ATN officers to abide by this process and ensure that the checklist is constantly updated and populated. Not completing the checklist means your duties were not completed during your shift, this will be addressed as absenteeism or incompetence.  Matsapha has moved from P3 to P1, and that information should reflect on the checklist going forward from the 8 <sup>th</sup> of August.  <b>7.2 MMS Faults</b> There has been a big improvement with logging of the faults and completing of the reports. Appreciation to the team.  <b>7.3 Communicators Sessions</b> A session between Mcdon and the officers at the ATN will commence, where we will be sharing information as well as ideas to improve our unit and improve work morale, to close any gaps between what we currently do and what we should actually be doing.  <b>7.4 New MMS (On Key)</b> A few officers have been sent on training regarding the implementation of the new MMS System. The team members attending will come back and relay what they have learned to help the rest of the team. A session will take place next week, it will be recorded to help those who could not attend.	Mcdon	

8	<b>NOTAM</b>  <b>8.1 General – Procedures, Errors, and Notam Manual</b> To update officers on the NOTAM group	Itumeleng	
9	<b>Flight Planning/Briefing</b>  <b>9.1 General – FPL Manual</b> None to report on  <b>9.2 FOP, LP &amp; OP for General Flights</b> Officers will be engaged on the NOTAM group	Itumeleng	
10	<b>Dynamic Data</b>  <b>10.1 General</b> Teams on Dynamic was logged out. It will be fixed, and AIRIC dates to be updated.	Itumeleng	
11	<b>File2Fly</b>  <b>11.1 General</b>  An employee was tasked to note down concerns we have regarding FOPs. Those concerns were shared with Mahendra and our Senior Management.  We have been facing a challenge where new users are unable to register, the issue has been handed over to Matthews to resolve the problem and the team will be updated on the outcome.	Mcdon	
12	<b>General Matters &amp; New Items</b>  <b>12.1 Audit Feedback</b> We had a few findings from our last audit. We discovered that training logs were not being completed as required. Going forward this will have a financial impact, as no claims will be approved when the log is incomplete, which states that the training was not done.  We are happy to share that we have corrected a finding from our previous Audit; where employees were unable to use SharePoint and retrieve documents; which has since improved and is no longer a finding.  We have also seen an improvement, where we had no findings in the SSIs and Occurrence Logs.  A repeat finding regarding Personnel Files, training certificates are not being filed and updated on time.	Mcdon	

	<p>HR will be engaged regarding the contents of our Supervisory files. Staff is encouraged to always produce their training certificates as well as relevant documents that should be placed on Personnel Files as soon as they are received from ATA, upon completion of their respective courses.</p> <p><b>12.2 Attendance Registers</b></p> <p>Attendance register has been moved to electronic. From Cycle 7 going forward we will be using the electronic version. This will help the administrator to have access to all registers, including those of the employees who are on leave and are unable to complete a paper register.</p> <p>The online register will be made available for all team members. Any challenges in accessing or completion of the electronic attendance registers must be brought to management attention.</p> <p><b>12.3 Overtime Claims</b></p> <p>Overtime claims have been an issue in terms of payment, within the required cycle, due to employees not completing registers on time. To mitigate the problem, we have decided to only record the hours, the employees has put down on their rostered cycle, without allowing them more time to complete their attendance registers, as previously done.</p> <p>All cycles will be completed, signed and submitted within a week of the end of the previous cycle to ensure that payments are made on time.</p> <p><b>12.4 Remastering to ATSO</b></p> <p>At the moment there is no system or documentation on how an AIMO can remaster to ATSO. As management we are busy with a process that will speak to how we can remaster ourselves to ATSO. Once that system is formulated, employees will be updated and those interested, will be added onto the programme which will require Core Content attendance for certification.</p> <p><b>12.5 Feedback on AIMU Staffing.</b></p> <p>There are 6 new employees who are currently on a Core Content Course that will be joining the team upon completion.</p> <p>An advertisement to bring back old employees has been published; however, interviews are still on hold.</p> <p>HR will be engaged to know the way forward as to when to expect interviews to commence and hiring process completed, as we are short staffed and in need for more people to help sustain the department.</p> <p><b>12.6 Feedback on AIM Conference</b></p> <p>No updates yet</p>	Ncebakazi	Mcdon
--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------	-------

	<p><b>12.7 Feedback on OD</b> As of July the structure at the top has changed. We no longer report to SM:AI rather to Head: Information Management &amp; Systems. OD process is now looking at Mid-level management which includes Pool managers and Supervisors. Once the structure has been populated, management will share the feedback to staff on which positions have changed or renamed.</p> <p><b>12.8 Cell phones on Position</b> Cell Phones on positions are not allowed as they are disruptive to the day-to-day duties. We have seen an increase on the personal use of the office computer to stream illegal and shady sites. Employees should refrain from using ATNS equipment for personal use especially on the internet where our systems could be in danger of getting hacked, like we experienced the previous year. There is a computer placed at the unit for all to access, where you can download certain files or use to access emails. Dodgy sites are a threat to the safety of ATNS, in an age where hackers work overtime to disrupt organisations.</p> <p><b>12.9 Late Coming/Early Leaving</b> Late coming should be reported by the employee running late. The reason for running late must be recorded on the Occurrence Log. Leaving early while the shift has not ended should also be recorded and reasons stating Why, to assist management to track the coming and going of employees. No late coming that is consistent will be tolerated. Few instances where situations are not in your control can be accepted, however it should not be a constant occurrence. Let us all try to work well with each other without inconveniencing each other. From cycle 7; employees found to be late at work or leave early without authorisation will be approached via the SSIs and policies regarding late coming and leaving early.</p>		
13	Meeting Adjourned		

Approval of Meeting Minutes:

Seconded by:

Approved By:

Chairperson: Mpho McDon Moeti

Date: 26/03/2025

TO : AIMU NOTAM OFFICE  
FROM : Mahendra Sukdev  
DATE : 14 July 2025

**NOTAM INSTRUCTION 06/2025:**

1. ST HELENA NOTAM PROCEDURES
2. OBSTACLE NOTAM (Cranes, Windfarms, Solarfarms, Cellphone Towers, Weather balloon/ascent of free balloon)
3. DYNAMIC DATA: UPDATING OF DATA ON ANAIS

Good Day NOF

As part of our continuous improvement processes and standardisation of NOTAM being issued: I have requested ST HELENA to comply to the FLW procedure.

1. ST Helena **SHOULD NOT** be requesting NOTAM: "**AD OPEN: ALL SER AVBL.**" If they do, kindly REJECT.
2. The NOTAM must state Which SER are AVBL. In line with ICAO Standards, Different NOTAM for each SER must be issued by the NOF.
3. For ADDN HR OF SER: Different NOTAM for each SER must be issued by the NOF and ST HELENA must provide the frequency in use for TWR and APP.
4. If the AD is CLSD: Issue 1 NOTAM, stating AD CLSD. ***Don't issue multiple NOTAM for each SER that is closed.***

**OBSTACLE NOTAM:**

1. As per email attached from the SA CAA: NOF does not need approval from SA CAA to issue Obstacle Notam.
2. **NB/When receiving an Obstacle Notam request: The NOF must first request a SA CAA obstacle approval certificate (see attachment for example) from the NOTAM requestor.**
3. **Only once the certificate is received, should the NOTAM be issued.**
4. Upon issuing the Obstacle NOTAM; Please send a copy to the SACAA AIS office for awareness purposes.

**UPDATING DATA ON ANAIS:**

We have picked up a major loophole relating to the updating of DATA on ANAIS. The ARINC 424 file created by DIS, that is used to update ANAIS, on AIRAC date, only contains updated DATA which has been incorporated into the SA AIP.

This resulted in a major incident on the 15 MAY, where waypoint "UNPOM" was a NEW STAR for FAOR which was effective on the 15 MAY and FPL filed by AIRLINES, were REJECTED due to the "UNKNOWN WAYPOINT" on ANAIS.

***As a mitigation; the FLW will procedure will apply:***

- All Waypoints, Airport Terminal Waypoints, Navaids, Routes, etc.. that requires ANAIS to be updated must be updated using the latest AIP SUP on AIRAC date.
- CHARTS AIP SUPPS are published with "AERONAUTICAL DATA TABULATION" information (see examples attached); using this INFO, perform a quality check on all published information, as well as insert all NEW INFORMATION onto ANAIS.

**NB/IF you cannot find the 'AERONAUTICAL DATA TABULATION' information on the charts, please ask for HELP. If you have challenges with inserting NEW DATA on ANAIS, please ask for HELP. Don't leave things unattended. You are compromising Safety.**

Thank You.

Please ensure strict compliance.

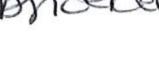

Any queries/concerns to the above instruction can be directed to AIMU Management.

Kind regards,

Mahendra Sukdev

**NB/Please sign in the relevant spaces provided**

**The instruction must be signed immediately as part of your taking over shift duties. If one is on leave, the instruction should be signed on the 1st day of you returning to work.**

**CA15/2/Rand Airport**

**Ref. CAA\_2021\_9 309**

Attention: Lourens van Pletzen

**Conditional Approved: for the Building Site Development proposed at Rand Airport Park Ext 7.**

After evaluating the site position to the obstacle application form 11 October 2021 and 23 February 2022, in principle the SACAA has **no objection**, the following conditions and restrictions applies:

- This approval is granted for the site Development Plan;
- Structure development is restricted to an all-inclusive height, not exceeding 24.6m (above ground level).

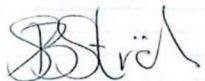

Physical structure restriction proposed for planning purposed:

- Any exterior lighting is restricted to full cut-off lighting 0° above the horizontal plane.
- Non-reflecting painting and Materials should be applied to reduce glare and prevent blinding pilots.
- Being adjacent to an airport, the developer should bring the subject of aircraft noise to the attention of tenants and it should be explicitly indicated on tenant's contracts and owners title deeds.
- Kindly note that approval for the construction of cranes, if used, must be obtained 6 weeks prior to construction from this department.

**This conditional approval is valid for 5 years from the date of this letter.**

Note that this SACAA letter of no objection does not substitute or replace other approvals which may be required by the applicant.

Yours truly,

Lizell Stroh

Name of meeting : AIMU Pool Meeting  
Department : AIMU  
Date of Meeting : 10 July 2025

No:	Item	Responsible Person	Date
1.	<b>Welcome</b> PM welcomed all to the meeting.	Mcdon	
2.	<b>Attendance</b> 2.1 Attendance registers as attached. 2.2 Apologies noted: No Apologies	Mcdon	
3	<b>Approval of Agenda</b> 3.1 Agenda was approved by all		
4.	<b>Confirmation of the Minutes</b> 4.1 Minutes of the previous meeting are in a draft form due to incompleteness of meeting. Minutes will be published once these meetings are consolidated.	Mcdon	
5	<b>Matters Arising</b> 5.1.1 N/A		
6.	<b>Feedback on OD</b> The proposed structure has been approved; however, the implementation process is still on hold due to the suspension of OD. Once the MIT allows for the OD process to resume, we will update colleagues accordingly.	Mcdon	
7	<b>Standing Items</b> The lighting issue in the office is being discussed with the building administrator to switch our lighting from automatic to manual switch. This change will help with controlling how much light comes in during different shift hours especially during night shift as less lighting is needed then.  Colleagues to note that the DB box is off limits, no one is permitted to touch the box as it is a live electricity container, any injuries that might be sustained during that period, you will not be compensated under injury on duty. The DB box is to be accessed by authorised individuals only to avoid incidents.  The smell that has been lingering in the office has been dealt with. A deep cleaning company was procured, and the cleaning has taken place. We confirm that there has been no smell reported since the cleaning was conducted.	Mcdon	
7.1	<b>Values Moment – Accountability</b> We discussed the significance of accountability in the workplace, encouraging colleagues to take responsibility for their actions, Management stressed the need for thorough research and	Mcdon	

	<p>preparation before making decisions, particularly when addressing clients or colleagues. One should provide factual backing for their arguments and avoid laying blame on other people.</p>		
7.2	<p><b>SAFETY</b></p> <p>Previously we had safety concerns regarding the office's electrical systems, advising colleagues to avoid tampering with the distribution box. The completion of deep cleaning has been confirmed with no new complaints, and we acknowledged Mahendra's efforts in promoting engagement with the Quality Management System (QMS).</p> <p>Management emphasised to colleagues the importance of accountability in the workplace, urging team members to take responsibility for their actions and to support their statements with factual evidence.</p> <p>Colleagues are reminded the importance of using the biometric scanners, when entering or exiting the building, even when you find the door open. This is for accurate tracking during emergencies.</p>	Mcdon	
7.3	<p><b>OHAS</b></p> <p>Safety protocols were discussed, stressing the necessity of fingerprinting upon entering and leaving the building for emergency tracking. Our first aid representatives, including Mcdon, Themba, and Jabulile, and the team was reminded to take the first aid kit during drills. Only trained first aiders or OHS representatives are permitted to carry first aid kits during evacuations, while any staff member can carry the occurrence log.</p> <p>There is a need to regulate the air conditioning temperature in the office to protect sensitive equipment and improve air circulation, particularly during flu season. We will be reopening of the glass door at the ATN Centre and then mount a warning sticker and reflectors for safety.</p>	Mahendra	
7.4	<p><b>QMS</b></p> <p>The QMS processes will now occur quarterly, with all team members having completed their Q1 certifications, and we received positive feedback from auditors regarding the training.</p>	Mahendra	

8.	<p><b>ATN Centre</b></p> <p><b>8.1 Faults</b> As ATN employees I implore you to be very inquisitive, this is very important for us to become experts in the systems that we use. Faults are being opened on the new system which is good improvement.</p> <p><b>8.2 ATN Manual</b> The SSIs and the appendices to the SSIs have been updated, published and signed off. Those documents can be found on the ATNS SharePoint. I have communicated in the AIM WhatsApp group the steps to take into accessing those documents. Further to that, Mahendra is going to issue an instruction with those steps on how to access the documents on SharePoint. We have created a link on SharePoint to be able to access the documents. Building up to that also, this is new platform for the entire AIM &amp; Systems Department to store all official documents.</p> <p>All our documents that we use within our department will be stored onto the platform. Colleagues we encourage you to familiarize yourself with the platform for everything we envision is stored in there. From instructions to memos, to SSIs, basically every working document we have in our department to be accessed from one place.</p> <p><b>8.3 New MMS (on Key)</b> With challenges faced with the new system at the ATN Centre we encourage colleagues to seek help from those who have received training, specifically Yanga and Tshikani. Makgabo pointed out that not all team members had access to initial training and proposed a collective training session to ensure everyone is up to date. In support of what Makgabo said there is a need for a structured approach to training based on specific requirements raised by team members. Yanga has availed herself to help train anyone who wishes to learn about the new ON Key system.</p>	Mcdon	
9	<b>NOTAM</b>	Mahendra	

	Page 9 of 14	Date
--	--------------	------

	<p><b>9.1 General – Procedures, Errors, and Notam Manual.</b></p> <p>Congratulations to the recent appointees, Thabiso and Clyve as the new NOTAM officers. Some changes have been made on the NOTAM procedures, including the need for CAA approval from data originators. We recently experienced challenges during the AIRAC cycle updates where certain waypoints were mistakenly deleted from the system. The importance of verifying data against the latest charts is very important and must be followed precisely to avoid incidents. The team is working to restore the deleted FIRs and ensure proper updates for the August ARINC 424 files.</p>		
10	<p><b>Flight Planning/Briefing</b></p> <p><b>10.1 General – FPL Manual</b></p> <p>Congratulations to our new AIM officers who just went Solo, namely Edith, Busi and Tendani. Colleagues, please note instruction 06 of 2025 in terms of RPAS operations. When you look at the RPAS flight planning AIC, it speaks about BVLOS operations. Operations beyond visual line-of-sight operations. Staff to ensure that if a remark is noted as BVLOS operations in field 18 of the RPAS flight plan, your flight rule must be IFR under the flight rule field 8. It can't be BVLOS operations with VFR indicated there.</p> <p><i>FIELD 8 (FLIGHT RULES) - Insert 'I' for all flights which will be flying Beyond Visual Line of Sight (BVLOS) or those RPAS flights which will be climbing through a Transition Altitude and thus flying at a Flight Level. All these flights (BVLOS) will be considered to be flying under IFR and will therefore select IFR Flight Levels according to the Semi-circular Rule.</i></p> <p><i>If the transition altitude is not reached during BVLOS operations, the level will be indicated in altitude (e.g.: A004 or A010), not Flight Levels (FL).</i></p>	Mahendra	
11	<p><b>Dynamic Data</b></p> <p><b>11.1 General</b></p> <p>Nothing to Report</p>	Mahendra	
12	<p><b>File2Fly</b></p> <p><b>12.1 General</b></p> <p>We have learned that military aircrafts are coming into the country, if they have a military permit, that permit allows them to land at military airfields. If they intend to go to civilian airfields, they need to have a foreign operators permit. If you receive a flight plan, that is a military aircraft, but intend to land in Lanseria, for example, you need to verify</p>	McDon	

	<p>a foreign operators permit. In the case where they do not have the required permit, Reject the FPL and advise Management.</p> <p>Management to engage with the Department of Transport first before giving the military the green light to proceed coming into and leaving the country.</p> <p>Officers to ensure careful verification of foreign operators permits, especially for military aircraft intending to land at civilian airfields. The Department of Transport is scrutinising the FOP process. We need to be proactive in identifying inconsistencies in flight plans. Suggestions for improvement of the FOP process can be sent to AIM management for discussion in upcoming meetings.</p>		
13	<p><b>General Matters &amp; New Items</b></p> <p><b>13.1 Audit Feedback</b></p> <p>With regards to the audit feedback we keep having the same findings. Employees are required to do the admin requirements as per SSIs but are ignoring these tasks. Staff is urged to sign the occurrence log and attendance registers upon arriving and when leaving position. This is a requirement and cannot be ignored or omitted. We had a finding of training logs as well, they are not completed properly and some are left half completed, which is a serious issue as these logs are used to claim for OJTI training. All relevant information that needs to be included onto the training log must be included which involves the names of the trainer, the names of the trainee, the number of training hours etc..</p> <p>The signing of Memos and Instructions was also a finding as some employees ignore these documents even after being told that a new instruction or memo has been issued. These are all part of our SSIs administrative duties, we need to perform and complete but for some reason is always a finding during audit. Employees must check the memo file everyday they are at work for any new updates that may require their attention.</p> <p><b>13.2 Attendance Registers</b></p> <p>Registers must be completed after every shift and not only at the end of the cycle. It is a requirement that all staff members update their registers every time they arrive and leave work. This ensures that correct dates are captured as well as the correct start and finish times.</p> <p><b>13.3 Overtime Claims</b></p> <p>Attendance registers help with overtime claims as we use information from the register to make claims. Staff is reminded to ensure all necessary hours for 3rd Sundays, Holidays and OJTIs are</p>	Mcdon	

placed on the correct column to assist the administrator to note those claims from that cycle. For any claims that might have been missed and do not appear on the pay slip, staff to engage with management to get the issue resolved by the 5<sup>th</sup> of each month as it is a cut-off date.

#### **13.4 Remastering to ATSO**

The remastering process has been implemented and those interested have been added to the seniority list. 9 slots were allocated across 4 Core content courses in the current financial year. Employees are given an opportunity to write psychometrics based on their position on the seniority list and departmental staffing capacity, if they pass, they are placed in one of the four courses. In terms of the five that have been nominated for ATS rating: they were next in line to write psychometric assessments, and it was noted their Core content was still valid, and there were available slots in the ATS rating course.

#### **13.5 Feedback on AIMU Staffing.**

For a while the department has been struggling with understaffing. We are happy to announce that more people are scheduled to join AIMU throughout the course of the year. Staff is encouraged to receive these individuals with open arms and help train them to ensure the quality of the work and services we produce. Currently as a department we are sitting on 51 head count, by end of July we expect to have a head count of 60 plus employees. These numbers will help fill up gaps that will be left by employees who re-mastered/ resign and or go on leave for longer periods of time.

#### **13.6 Upcoming AIMU Projects**

File2Fly has been giving the department issues for a long time. ATNS is busy with a Tender process to acquire a new AIM System. The turnaround time for the new system is not yet known as it still an ongoing tender process. In the meantime, there is an ongoing project to upgrade File2Fly and ANAIS, to be implemented in the next 6 months, to combat the current problems the system is having.

The AFTN and AMHS system is also in the pipeline for an upgrade. The tender process is complete, and a supplier has been identified. The project team has been created, and the new system is in the process of being implemented. A new AFTN/ AMHS System will be used, and all employees will be trained on the new system. Staff is encouraged to utilise the training opportunity to learn as much as they can to know and understand the system fully.

#### **13.7 Cell phones on Position**

Staff has been reminded to refrain from using their cell phones while

on position. Cell phones are destructive and take attention away from the duties at hand which result in mistakes that can cause irreversibly problems in the department. Cell phones may always remain on but should not be used while on position. Only emergency calls can be made or answered but away from position, however no cell phone should be used for any other reason other the ones mentioned until the shift ends.

#### 13.8 Leave Planning

Management has noticed an increase in ADHOC and emergency leave requests, these requests strain the roster. Staff is encouraged to plan their leave in advance and ensure that it is captured on the leave plan. Leave that is not captured on the leave plan will not be considered once the roster is published.

#### 13.9 Acceptable usage of PCs

Operational and Office PCs are to only be used for work related issues. AIMU staff are asked to avoid using the PCs for entertainment as this can lead to potential risks on the data and applications stored on the PCs.

#### 13.10 Late coming/Early Leaving

No staff is allowed to leave early or come in late without the express permission from AIM Management.

#### 13.11 RUS Standby activations

RUS will only activate you for a shift from 06:00 to 21:00. No TEL calls will be made outside these hours.

#### 14 OJTI Meeting – Annual Proficiencies

We advised the team to participate in the Annual Proficiencies to help the department address Audit Findings. Management has been tasked to implement OJTI meetings regularly. All OJTI's are requested to attend these meetings.
